

ARE YOU A STUDENT MOM?

SMART

Student Mothers Achieving Real Triumph

SMART is a support and networking program which helps student mothers achieve academic success.

Program Components:

- ❧ Participants may enroll in ENGL 1111, crn 10317 (fall 2018). This section is exclusively for student moms.
- ❧ Participants may attend support workshops on Friday mornings throughout the semester.
- ❧ Participants may become involved in all other aspects of Women's Center programming.

Spending a semester in the SMART program helps student mothers become successful in college. Students will discover all the ins-and-outs of the college experience.

Program Benefits:

- ❧ Develop a support network which you can maintain throughout your college years.
- ❧ Gain access to resources which are available to students that you might not otherwise know about.
- ❧ Acquire skills to help you interact effectively with instructors and college personnel.
- ❧ Attend training workshops on topics related to overcoming barriers which could keep you from succeeding in college.

"Being a member of the SMART program has given me the knowledge of all the opportunities that I am eligible for. I made friends who are in similar situations, which makes it easier to understand how to juggle being a full-time mother and student."

"The workshops I enjoyed the most were the ones when we shared our fears and any obstacles we were experiencing. I felt that I wasn't alone and I gained very helpful ideas on how to work through the tough times."

"Being out of school for so long, I wanted support, friends and encouragement; the Women's Center provides that for me."
