Computer Information Technology

Credentials – Associates of Technical Studies

Careers and Job Titles

How do I get there?
      Click Here for our program requirements.

What will I learn?
- Principles of IT&CS
- Operating Systems: Skills and Techniques
- Systems Analysis & Design
- Network+ and Network Essentials
- Supporting Client Operating Systems
- Programming Logic

What will I do? The Associate of Technical Studies Degree in Computer Information Technology prepares or upgrades the graduate for career objectives requiring more than one computer-related specialization. Specializations can be combined from within, but not limited to, areas such as network support, end-user support, data analysis, software design and development, web content design and development, and media studies.
