MEDIA TECHNOLOGY

Creating media & communications

A media technologist is a communication professional responsible for the assistance in creating and delivering information to the public through various broadcast tools. They use the latest media technologies to create visual and audio experiences in amazing ways. The type of content media technologists can go on to produce is nearly unlimited, from educational videos to podcast recording and production, to entertainment programming, locally and across the globe.

Our students specialize in audio recording and production, interactive media design and delivery, radio production and broadcasting, and video production. They gain hands-on experience in Lakeland's state-of-the-art broadcast and recording facilities, gain a wide variety of skills that lead to better job opportunities, and can specialize their media technology degrees with the areas that interest them the most.

Quality Education

Professors at Lakeland are experts in their fields with real-world experience. Lakeland prepares you for a high-demand career or for transfer to a four-year college or university.

Affordable Tuition

Lakeland's tuition is about one-third the cost of most four-year schools. Many students are eligible to receive some form of financial assistance.

Convenience

Lakeland offers convenient day, evening, weekend and online courses.

Focus on Students

Lakeland offers a variety of student services to help you succeed, such as counseling, tutoring, computer labs, careers services, free parking and affordable child care.
