

Respiratory Therapy

Offered strictly in person, this program does not engage in online instruction. It is designed to satisfy Ohio's educational and licensure requirements for respiratory therapists. Since it is not a distance education program, NC-SARA out-of-state authorization does not apply. Students planning to seek licensure in other states should contact that state's respiratory care board to confirm whether additional exams, coursework, or supervised experience are necessary. Lakeland Community College seeks to maintain accurate disclosures but does not guarantee licensure or certification in every state.
