

Dental Assisting

This program is delivered in person only (no online component). Completion of the Dental Assisting program meets Ohio's educational requirements for licensure or certification, where applicable. Because the program is not offered via distance education, it is not subject to NC-SARA out-of-state distance authorization. Students planning to seek licensure or practice in another state should contact that state's licensing or regulatory body directly, as requirements vary and may include additional coursework, examinations, or supervised experience. Lakeland Community College seeks to maintain accurate disclosures but does not guarantee licensure or certification in every state.
