

### **Nursing Assistant (STNA)**

Offered entirely in person (no online courses), this program meets Ohio's educational and registration/credentialing requirements for State Tested Nursing Assistants (STNA). Because it is not delivered via distance education, NC-SARA out-of-state authorization is not relevant. Students considering employment in other states should check with that state's nursing assistant or health services board to confirm whether Ohio's credential is accepted or whether additional training or testing is required. Lakeland Community College seeks to maintain accurate disclosures but does not guarantee licensure or certification in every state.
