# Master Files Master Assessment Plan

#### Fire Science Department Outcome Set

Outcome 1

Articulate the five areas of the National Incident Management System (NIMS).

## Performance Indicator: 1.1

Define and give examples of preparedness.

Measure: Preparedness

| Details/Description:               |   |
|------------------------------------|---|
| Acceptable Target:                 | 70%   |
| Ideal Target:                      | 80%   |
| Implementation Plan<br>(timeline): | This performance indicator was assessed during the 2018-2019 academic year.                   |
|                                    | Most Fire Science Technology courses are offered on an alternating basis in a two year cycle. |
| Key/Responsible<br>Personnel       | Lee Silvi   |

#### Performance Indicator: 1.2

Define and give examples of ommunications and information managment.

Measure: Communication/Info Mgmt

#### Details/Description:

Acceptable Target: Ideal Target: 70%

80%

Implementation Plan (timeline): This performance indicator was assessed during the 2018-2019 academic year.

Most Fire Science Technology courses are offered on an alternating basis in a two year cycle.

Key/Responsible Personnel:

**Performance Indicator: 1.3** Define and give examples of resource management.

| Measure: Resource mgm                               | nt   |
|---|--|
| Details/Description:                                | 70%  |
| Acceptable Target:                                  | 80%  |
| Ideal Target:<br>Implementation Plan<br>(timeline): | This performance indicator was assessed during the 2016-2017 and 2018-2019 academic years.       |
|   | Most Fire Science Technology courses are offered<br>on an alternating basis in a two year cycle. |
| Key/Responsible                                     | Program Director   |

Performance Indicator: 1.4
Printed on: 7/7/2020 8:44:59 PM
Created
with W Watermark

Define and give examples of command and management.

Measure: Command/management

| Details/Description: |  |
|----------------------|--|
| Acceptable Target:   |  |
| Ideal Target:        |  |
| Implementation Plan  |  |
| (timeline):          |  |

This performance indicator was assessed during the 2016-2017 and 2018-2019 academic years.

Most Fire Science Technology courses are offered on an alternating basis in a two year cycle.

Key/Responsible Personnel: **Program Director** 

#### Performance Indicator: 1.5

Define and give examples of ongoing management and maintenance.

Measure: Ongoing mgmt

| Details/Description:               |  |
|------------------------------------|--|
| Acceptable Target:                 | 70%  |
| Ideal Target:                      | 80%  |
| Implementation Plan<br>(timeline): | This performance indicator was assessed during the 2018-2019 academic year.                      |
|                                    | Most Fire Science Technology courses are offered<br>on an alternating basis in a two year cycle. |

Key/Responsible Personnel: Outcome 2 Describe and distinguish building components and systems.

**Performance Indicator: 2.1** Identify various fire alarm systems.

> Measure: Written test Program level Direct - Exam

Details/Description:

In FIRE1170 students will be assessed on a written final examination. There are questions directly related to this performance indicator.

Acceptable Target: Ideal Target: Implementation Plan (timeline):

This performance indicator was assessed during the 2016-2017 and 2018-2019 academic years.

Most Fire Science Technology courses are offered on an alternating basis in a two year cycle.

Key/Responsible Personnel: Lee Silvi

Performance Indicator: 2.2

Identify the major components of various types of fire protection systems.

Measure: Written test Program level Direct - Exam

Details/Description:

In FIRE1170 students will be assessed on a written final examination. There are questions directly related to this performance indicator.

Acceptable Target: Ideal Target: Implementation Plan (timeline):

This performance indicator was assessed during the 2016-2017 and 2018-2019 academic years.

Most Fire Science Technology courses are offered on an alternating basis in a two year cycle.

Key/Responsible Personnel: Lee Silvi

## Performance Indicator: 2.3

Differentiate between the five major types of building construction to establish strategy tactics for incidents.

Measure: Written Test
 Program level Direct - Exam

Acceptable Target:

Implementation Plan

Ideal Target:

(timeline):

Details/Description: In FIRE 2280 students will be assessed on a written final exam. There are questions directly related to this performance indicator on the final exam.

This performance indicator was assessed during the 2013-2014, 2016-2017, and 2018-2019 academic years.

Most Fire Science Technology courses are offered on an alternating basis in a two year cycle.

Key/Responsible Personnel: Lee Silvi

Measure: Written test Course level Direct - Exam

| Details/Description:               | In FIRE1290 students will be assessed on a written<br>final examination. There are questions directly<br>related to this performance indicator. |
|------------------------------------|---|
| Acceptable Target:                 | 70% class average on the post test  |
| Ideal Target:                      | 80% class average on the post test  |
| Implementation Plan<br>(timeline): | This performance indicator was assessed during the 2017-2018 and 2019-2020 academic years.  |
|                                    | Most Fire Science Technology courses are offered<br>on an alternating basis in a two year cycle.  |
| Key/Responsible<br>Personnel:      | Tom Sitz / Mike Kocab / Lee Silvi   |

Outcome 3 Choose appropriate strategy, tactics, and methods to successfully manage emergency incidents.

Lee Silvi

**Performance Indicator: 3.1** List strategic goals in priority order for various types of incidents.

Measure: Strategic goals

Details/Description: Acceptable Target: Ideal Target: Implementation Plan (timeline):

This performance indicator was assessed during the 2015-2016, 2017-2018 and 2019-2020 academic years.

Most Fire Science Technology courses are offered on an alternating basis in a two year cycle.

Key/Responsible Personnel:

Printed on: 7/7/2020 8:44:59 PM Created with

#### Performance Indicator: 3.2

Analyze and select the appropriate tactics and methods to achieve strategic goals.

Measure: Strategy and Tactics Course level Direct - Other

| Details/Description:               | By the end of the semester, students in FIRE 2340<br>are expected to be able formulate strategic goals<br>for a hazardous materials incident, and propose<br>appropriate tactics (objectives) to safely and<br>effectively achieve the strategic goals of a mock<br>incident. |  |  |  |  |  |  |
|------------------------------------|---|--|--|--|--|--|--|
| Acceptable Target:                 | 70%   |  |  |  |  |  |  |
| Ideal Target:                      | 80%   |  |  |  |  |  |  |
| Implementation Plan<br>(timeline): | This performance indicator was assessed during the 2013-2014, 2015-2016, 2016-2017, 2017-2018, and 2019-2020 academic years.  |  |  |  |  |  |  |
|                                    | Most Fire Science Technology courses are offered<br>on an alternating basis in a two year cycle.  |  |  |  |  |  |  |
| Key/Responsible                    | Lee Silvi and others TBA  |  |  |  |  |  |  |

Personnel:

Outcome 4

Demonstrate and exhibit an understanding of the profession of the fire service.

#### Performance Indicator: 4.1

Recognize why history and culture have an effect on today's fire service.

Measure: History and Culture

Printed on: 7/7/2020 8:44:59 PM Creeted with watermark Details/Description: Acceptable Target: Ideal Target: Implementation Plan (timeline):

This performance indicator will be scheduled for assessment in the future.

Most Fire Science Technology courses are offered on an alternating basis in a two year cycle.

Key/Responsible Personnel:

**Performance Indicator: 4.2** Exhibit the characterisitics of a fire service professional.

Measure: Professional characteristics

Details/Description: Acceptable Target: Ideal Target: Implementation Plan (timeline):

This performance indicator was last assessed in 2016-17. It will be reassessed in the future.

Most Fire Science Technology courses are offered on an alternating basis in a two year cycle.

Key/Responsible Personnel:

Performance Indicator: 4.3

Analyze current issues and develop appropriate solutions that impact the fire science professional.

Measure: Current Issues Course level Direct - Other

| Details/Description:               | Methods being considered include a short answer<br>essay test question or a brief student report, but as<br>this is a work in progress the exact methodology is<br>subject to change. The final method that is selected<br>will be one that can effectively be used<br>comparatively in both CRNs of this course. |  |  |  |  |  |
|------------------------------------|---|--|--|--|--|--|
| Acceptable Target:                 | 70%   |  |  |  |  |  |
| Ideal Target:                      | 80%   |  |  |  |  |  |
| Implementation Plan<br>(timeline): | This performance indicator was assessed during the 2013-2014, 2016-2017 and 2018-2019 academic years.   |  |  |  |  |  |
|                                    | Most Fire Science Technology courses are offered<br>on an alternating basis in a two year cycle.  |  |  |  |  |  |
| Key/Responsible<br>Personnel:      | Lee Silvi   |  |  |  |  |  |

## Performance Indicator: 4.4

Articulate why "Everyone Goes Home" is important to firefighter safety and survival.

Measure: Everyone goes home

Details/Description: Acceptable Target: Ideal Target: Implementation Plan (timeline):

This performance indicator was assessed during the 2014-2015, 2016-2017 and 2018-2019 academic years. This was done in FIRE 2380.

Most Fire Science Technology courses are offered

on an alternating basis in a two year cycle.

Key/Responsible Personnel: Lee Silvi

**Performance Indicator: 4.5 Fire service manager or administrator** Explain and demonstrate the characteristics of a fire service manager or administrator

Measure: Characteristics of a Fire Service Manager
 Course level Direct - Other

| Details/Description:               | This is a work in progress, A method under<br>consideration is a role play for the classroom<br>course and a student submitted video role play for<br>the online course. The final method that is selected<br>will be one that can effectively be used<br>comparatively in both CRNs of this course. |
|------------------------------------|--|
| Acceptable Target:                 | 70%  |
| Ideal Target:                      | 80%  |
| Implementation Plan<br>(timeline): | This performance indicator was assessed during the 2013-2014 and 2016-2017 academic years.   |
|                                    | Most Fire Science Technology courses are offered<br>on an alternating basis in a two year cycle.   |
| Key/Responsible<br>Personnel:      | Lee Silvi  |

Outcome 5 Demonstrate the ability to design and present programs for fire-related issues.

**Performance Indicator: 5.1** Analyze data to interpret community educational needs.

• Measure: Community educational needs

| Details/Description:               |  |
|------------------------------------|--|
| Acceptable Target:                 | 70%  |
| Ideal Target:                      | 80%  |
| Implementation Plan<br>(timeline): | This performance indicator was assessed during the 2015-2016, 2017-2018, and 2019-2020 academic years. |
|                                    | Most Fire Science Technology courses are offered<br>on an alternating basis in a two year cycle.       |
| Key/Responsible<br>Personnel:      | Lee Silvi  |

#### Performance Indicator: 5.2

Recognize how demographics and culture affect community relations and programs.

Measure: Demographics

| Details/Description:               |  |
|------------------------------------|--|
| Acceptable Target:                 | 70%  |
| Ideal Target:                      | 80%  |
| Implementation Plan<br>(timeline): | This performance indicator was assessed during the 2015-2016, 2017-2018, and 2019-2020 academic years. |
|                                    | Most Fire Science Technology courses are offered<br>on an alternating basis in a two year cycle.       |
| Key/Responsible<br>Personnel:      | Lee Silvi  |

#### **Performance Indicator: 5.3**

Analyze, develop, and present an audience specific presentation.

Measure: Audience specific presentation

| 70%  |
|--|
|  |
| 80%  |
| This performance indicator was assessed during the 2015-2016, 2017-2018, and 2019-2020 academic years. |
|  |

Most Fire Science Technology courses are offered on an alternating basis in a two year cycle.

Key/Responsible Personnel:

#### Performance Indicator: 5.4

Demonstrate the ability to articulate and exchange ideas using multiple forms of expression.

Measure: Articulate/express ideas

Details/Description: Acceptable Target: Ideal Target: Implementation Plan (timeline):

This performance was tentatively scheduled for Spring 2019. Instead, it was assessed Fall Semester 2019, as FIRE 1350 was well suited to assess this

item.

Most Fire Science Technology courses are offered on an alternating basis in a two year cycle.

Key/Responsible Personnel:

Last Modified: 07/07/2020 08:44:29 PM EDT

## **Mission Statement**

#### Fire Safety:

To offer professional level education to meet personnel needs in the fields of fire science, fire fighting, fire prevention, and emergency management; to serve as a leader in advancing professionalism in those fields; and promote effective, efficient fire fighting and emergency management by designing and delivering high quality, initial and continuing education which will prepare pre-service and in-service firefighters for promotional opportunities.
