

Medical Assisting

This program is offered only in person; no online courses are included. It is structured to meet Ohio's educational requirements for medical assisting certification or registration. Since it is not delivered via distance education, NC-SARA out-of-state authorization is not invoked. Students planning to practice or be certified abroad should check with the relevant state or national certification board to ensure their credentials, coursework, or experience meet that body's standards. Lakeland Community College seeks to maintain accurate disclosures but does not guarantee licensure or certification in every state.
