

Lakeland Community College Teaching Learning Center (TLC)

\$265/Week

For children entering grades K-2,
as of August 2026

Register for one week or all four! 9am-3pm
For more information, call 440.525.7500

JUNE

1-5 It's Alive! Plants, Animals & Us!

Campers will learn all about plants, animals, and the human body through hands-on experiments, creative projects, and outdoor investigations. Along the way, they will build curiosity and confidence as they ask questions, make discoveries, and explore how living things grow, change, and interact with the world around them.

8-12 Funky Physics

Force, motion, gravity, and magnetism! Campers will explore forms of matter and how they move, fall, spin, and interact through hands-on activities, experiments, and challenges. We will develop our critical thinking skills while discovering how physics shapes the world around us.

15-18 Let's Get Digital! (4-day week)

Using technology, simple robotics, age-appropriate coding, and technology-based challenges can be used for problem-solving. As technology continues to evolve, this week empowers students to imagine, design, and build, aiming to nurture their love of discovery and inspire the innovators of tomorrow.

(No camp on June 19th, as the college is closed in observance of Juneteenth)

22-26 Masterpieces & Makers

Explore art and innovation like an artist! Art styles and creative movements will guide us to learn where art, science, technology, engineering, and math collide. We will experiment with color, texture, tools, and design while creating our very own masterpieces. Let's get creative!
