

Surgical Technology

This program is delivered in person only and includes no online component. Completion meets Ohio's educational and credentialing requirements for surgical technologists (or applicable state board). Because it is not delivered by distance education, NC-SARA out-of-state authorization is not triggered. Students intending to work in another state should verify with that state's surgical technologist regulatory/licensing body that their education, clinical hours, and certification will be recognized or whether additional steps are required. Lakeland Community College seeks to maintain accurate disclosures but does not guarantee licensure or certification in every state.
