

### **Emergency Medical Technology – EMT Basic**

This program is delivered in person only; no online courses are offered. It meets Ohio's educational requirements for EMT-Basic certification. Because it is not a distance education program, NC-SARA out-of-state distance authorization does not apply. Many states require National Registry (NREMT) certification and additional state review or equivalency evaluation for reciprocity. In states that are members of the EMS Compact (REPLICA), certain privilege-to-practice provisions may apply, but that is not the same as full licensure. Students planning to work outside Ohio must verify requirements with the target state's EMS licensing board. Lakeland Community College seeks to maintain accurate disclosures but does not guarantee licensure or certification in every state.
